Key points

1. Perth reported prices averaged 233.9 c/L for U91 in October 2026, up 13.8 c/L on September 2026.
2. In October 2026, diesel averaged 270.6 c/L in Perth, up 7.7 c/L on September 2026.
3. Since our records began on 13 April 2026, Perth's highest daily U91 average was 245.7 c/L on 14 October 2026 and its lowest 147.9 c/L on 30 June 2026. The high was set in October 2026.
4. Perth's daily U91 average went from 236.4 c/L on 1 October to 228.4 c/L on 31 October, and diesel from 274.9 c/L to 271.3 c/L.
5. The highest daily average in Perth was 245.7 c/L for U91 on 14 October and 274.9 c/L for diesel on 1 October.
6. Since 1 July 2026 in Perth: U91 up 64.3 c/L, diesel up 94.3 c/L, P95 up 64.7 c/L, P98 up 65.0 c/L and LPG up 3.2 c/L.
7. Perth ranked second cheapest of the 8 capital cities for U91; Adelaide was the cheapest at 233.1 c/L and Hobart the dearest at 247.3 c/L.
8. On 31 common dates in October 2026, Perth's U91 daily averages had a mean of 233.9 c/L, against 228.8 c/L at the Perth terminal: a gross spread of 5.1 c/L. Each date counts equally; this is not the station-day-weighted headline mean or a profit estimate.
9. The Perth terminal gate price averaged 228.8 c/L for unleaded and 255.6 c/L for diesel, up 14.0 c/L and up 5.4 c/L on September 2026.
10. Wholesale unleaded averaged 228.8 c/L at the Perth terminal, a record: the dearest wholesale month since AIP's series began in January 2004 (the previous high was September 2026 at 214.8 c/L); the cheapest of the last ten years was April 2020 at 82.0 c/L.
11. Perth's U91 price cycle ran in October 2026: four hikes lifted the margin over the terminal gate price by 12.8 c/L on average, with peaks about 7.0 days apart.
12. Oakford (rural) was the cheapest town we ranked for U91 at 222.5 c/L, 11.4 c/L below Perth.

Cents a litre. Change is on September 2026. Difference is the rest against Perth.

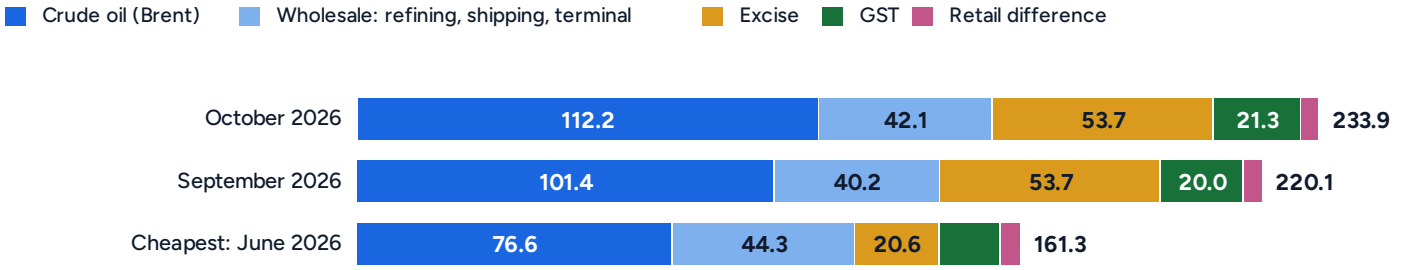

Perth averaged 233.9 c/L for U91 and the rest of Western Australia 254.8 c/L, so reported prices in the rest of Western Australia averaged 20.9 c/L more than Perth. Perth averaged 270.6 c/L for diesel and the rest of Western Australia 288.9 c/L, so reported prices in the rest of Western Australia averaged 18.3 c/L more than Perth.

What makes up a litre in Perth

A benchmark illustration using differently weighted period averages, not a matched purchase basket or a retailer's measured costs. The same-date retail/TGP comparison follows separately.

> Of the 233.9 c/L U91 average in Perth, crude oil was 112.2 c/L, wholesale 42.1 c/L, excise 53.7 c/L, GST 21.3 c/L and the retail difference 4.6 c/L. Of the 270.6 c/L diesel average in Perth, crude oil was 112.2 c/L, wholesale 66.5 c/L, excise 53.7 c/L, GST 24.6 c/L and the retail difference 13.6 c/L. Premium 95 has no terminal gate price of its own, so its breakdown uses the unleaded price and its premium sits in the retail difference. Our retail records begin on 13 April 2026, so earlier periods show the wholesale side only.

Premium 95 has no terminal gate price of its own. We use the unleaded price, so the premium grade's extra wholesale cost sits in its retail difference, and we give no margin for it.

Retail: FuelRadar station-day averages for Perth; our retail records begin on 13 April 2026, so a period before then has the wholesale side only, and "dearest" and "cheapest" compare the periods since our records began. Last year's average is the previous calendar year. Until we have a full calendar year of retail prices it

shows the wholesale side only: the terminal gate price, crude oil and excise. Its GST, retail difference and margin need a retail price, so they are left out. Terminal gate price: AIP, Perth terminal, carried over weekends. Crude oil is the US Energy Information Administration Brent spot price (FRED series DCOILBRENTEU), converted to Australian cents a litre at each day's exchange rate (FRED series DEXUSAL) and 158.987 litres a barrel, then averaged over the days both are published. Excise: ATO, averaged over the period's days. Wholesale is the terminal gate price without GST and excise, less crude oil. GST is one eleventh of the retail price. The retail difference is what is left: the retailer's costs and margin, without its GST. Bands are rounded so they add up to the retail price.

Cents per litre, with GST. Each common date counts once. Retail is the mean of the saved daily capital averages, not the station-day-weighted headline mean. TGP uses the same dates and carries the last published value for at most six subsequent calendar days. Retail prices can already include carried station prices. Means and spreads are rounded separately. The gross spread is not profit or a causal explanation. Retail carry limit: 30 days. Unmatched days are excluded; the common-day count is not a station or sales coverage percentage.

Market trends

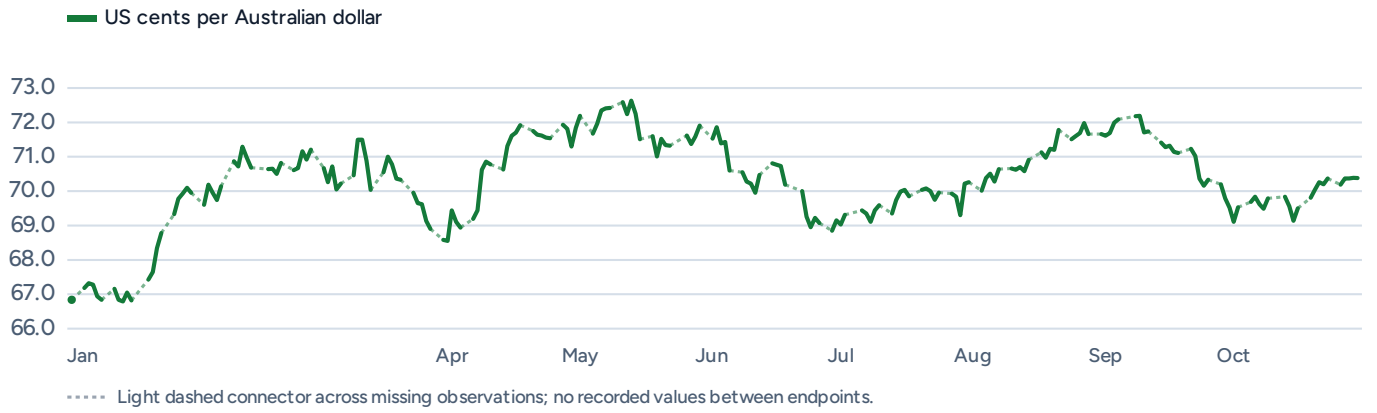

1 January 2026 to 31 October 2026. Prices in Australian cents per litre; the dollar chart uses US cents per A$.

> The Perth terminal gate price averaged 228.8 c/L for unleaded and 255.6 c/L for diesel, up 14.0 c/L and up 5.4 c/L on September 2026. Brent crude averaged US$124.8 a barrel, or 112.2 c/L in Australian dollars, with the Australian dollar at an average of 69.88 US cents.

Retail: FuelRadar daily averages for Perth. Terminal gate prices (dashed): AIP, Perth terminal. Brent crude: US EIA spot price via FRED, converted at each day's exchange rate and 158.987 litres a barrel.

Light dashed connectors join recorded endpoints across missing observations, including weekends and holidays; no recorded values lie between those endpoints. Gaps longer than 14 missing days have labelled no-data bands instead. Leading and trailing gaps are not extended. Brent needs both an oil price and exchange rate on the same day.

Records and the long run

Perth's highest and lowest days since our records began

> Since our records began on 13 April 2026, Perth's highest daily U91 average was 245.7 c/L on 14 October 2026 and its lowest 147.9 c/L on 30 June 2026. The high was set in October 2026. Since our records began on 13 April 2026, Perth's highest daily diesel average was 315.7 c/L on 13 April 2026 and its lowest 167.8 c/L on 30 June 2026.

Wholesale prices in the long run

> Wholesale unleaded averaged 228.8 c/L at the Perth terminal, a record: the dearest wholesale month since AIP's series began in January 2004 (the previous high was September 2026 at 214.8 c/L); the cheapest of the last ten years was April 2020 at 82.0 c/L. Wholesale diesel averaged 255.6 c/L at the Perth terminal, the dearest wholesale month since April 2026 (270.4 c/L); the cheapest of the last ten years was May 2020 at 95.9 c/L. These are wholesale prices, not what drivers paid at the pump, and nominal prices, not adjusted for inflation.

Terminal gate price	This month	Against the series	Previous high	Cheapest in ten years	Rank in ten years
Unleaded	228.8	Record: dearest since AIP's series began in January 2004	September 2026 (214.8)	April 2020 (82.0)	121 of 121
Diesel	255.6	Dearest since April 2026 (270.4)	April 2026 (270.4)	May 2020 (95.9)	120 of 121

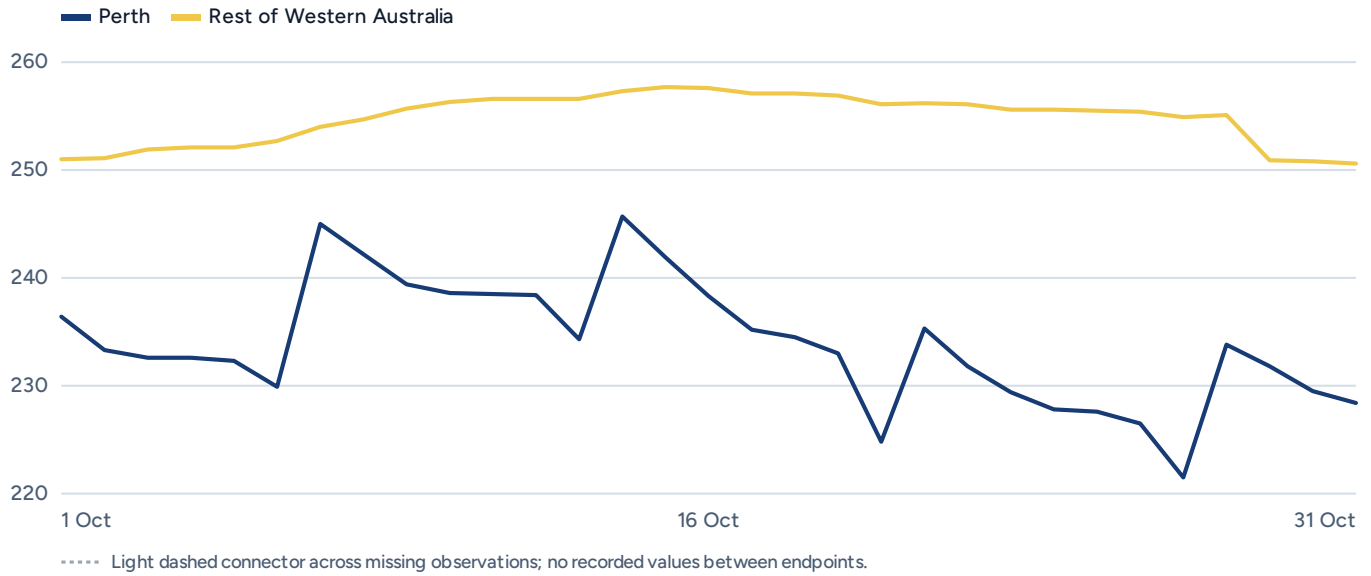

Wholesale, not retail: AIP's terminal gate prices at the Perth terminal, with GST, the mean of each month's calendar days since AIP's series began. These are nominal prices, not adjusted for inflation. "Previous high" is the dearest month before this one. Rank 1 is the cheapest month of the last ten years, this one included.

The price cycle and excise

> Perth's U91 price cycle ran in October 2026: four hikes lifted the margin over the terminal gate price by 12.8 c/L on average, with peaks about 7.0 days apart. The largest took the U91 average from 224.8 c/L on 20 October to 235.3 c/L on 21 October, while the terminal gate price fell 3.7 c/L.

Daily reported U91 averages, cents per litre. Light dashed connectors mark missing observations; labelled bands mark gaps longer than

14 days.

Price-cycle hikes in Perth's U91	From	c/L	To	c/L	Rise	Margin rise
1	6 October	229.9	7 October	245.0	+15.1	+12.1
2	13 October	234.3	14 October	245.7	+11.4	+13.2
3	20 October	224.8	21 October	235.3	+10.5	+14.2
4	27 October	221.5	28 October	233.8	+12.3	+11.5

How we count a price-cycle hike: Perth's daily U91 average less the Perth terminal gate price is the indicative margin, not profit. This margin and the retail average must each rise by at least 8.0 c/L within 5 days. Where station-rise counts are available, daily rises of at least 5.0 c/L, summed over the rise, must reach 25% of the station count at the peak; a station can count on more than one day. Rises within 3 days of an excise change are excluded. The margin must then ease by at least half within 21 days; if follow-up is too short, a counted hike can have unconfirmed easing. A regular cycle requires at least two detected hikes. No detected hike does not establish why retail prices changed.

Fuel excise

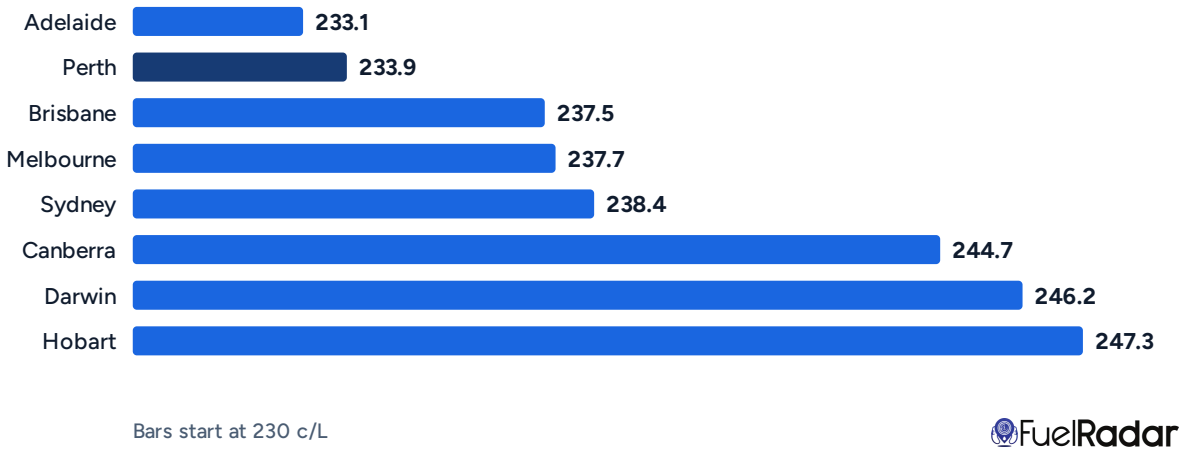

> Fuel excise stayed at 53.7 c/L for petrol and diesel through October 2026.

Petrol and diesel excise	Rate (c/L, before GST)	Change
In force on 1 October 2026	53.7

Excise is charged on fuel as it leaves the terminal, so it is already in the terminal gate price; GST is then charged on top.

The capital cities

Perth ranked second cheapest of the 8 capital cities for U91; Adelaide was the cheapest at 233.1 c/L and Hobart the dearest at 247.3 c/L. Perth ranked the cheapest of the 8 capital cities for diesel; Perth was the cheapest at 270.6 c/L and Darwin the dearest at 289.0 c/L.

Each capital is its ABS urban area, worked out exactly as in its own state's report. Green is the cheapest capital and red the dearest. Regional vs capital is the rest of the state's average less its capital's: a positive figure is how much higher regional reported prices averaged. Cycle hikes are the price-cycle hikes we counted in the capital in the period (our rule is in the price cycle section); a dash means we had no terminal gate price to read it against.

Perth by area

> Inside Perth, Perth South West was the cheapest area for U91 at 233.1 c/L and Mandurah the dearest at 235.9 c/L, a spread of 2.8 c/L.

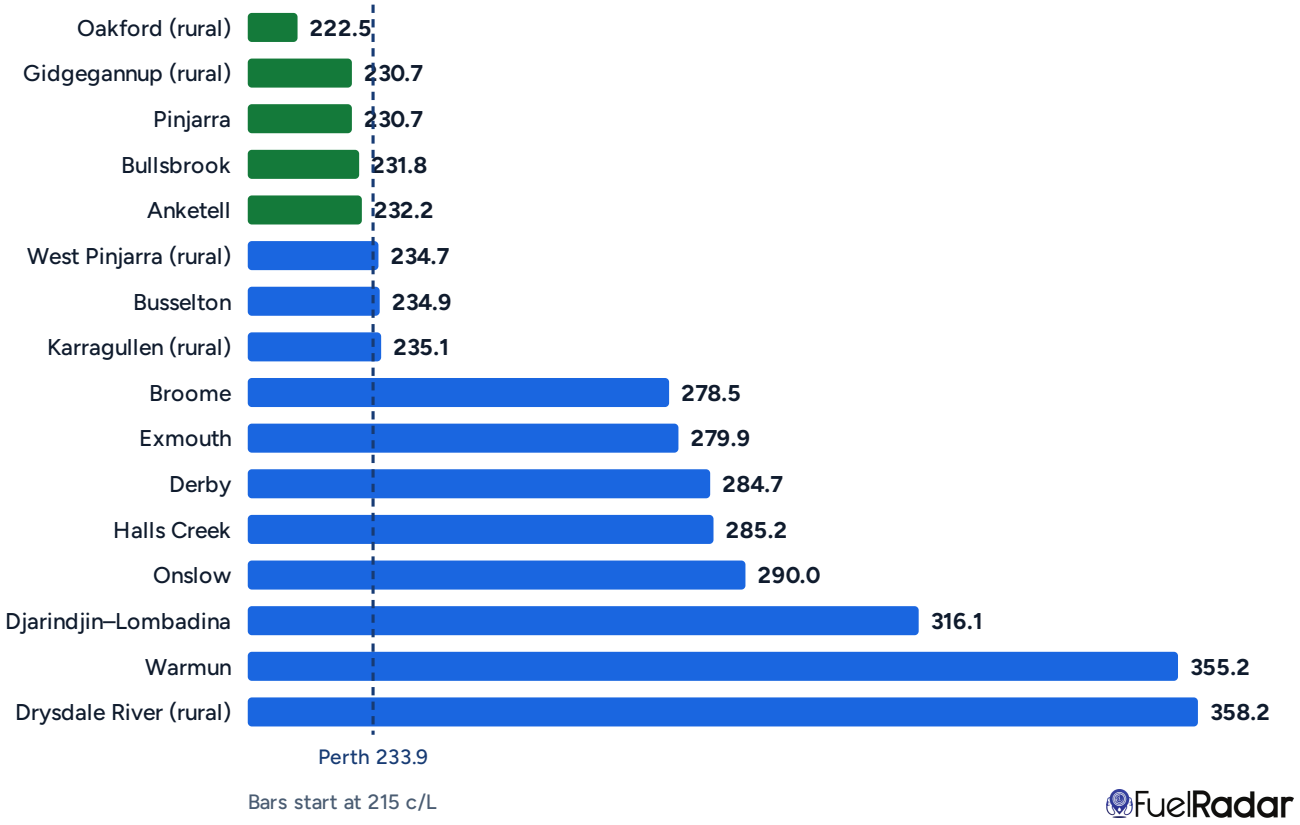

Period-average margins are omitted here: comparable daily inputs and weights are not retained for these rows.

Area (ABS SA4)	U91	Change	Diesel	Stations	Cheapest U91 station

Mandurah	235.9	+12.5	284.5	23	Vibe Mandurah (233.0)

Areas are the ABS Statistical Areas Level 4 (SA4, 2021) inside Perth's urban area, named in plain words ("Brisbane - East" is Brisbane East). An area counts its stations that reported on at least a quarter of the days; its average, station count and cheapest station all come from them, so the cheapest station never averages more than its area.

Regional towns

Oakford (rural) was the cheapest town we ranked for U91 at 222.5 c/L, 11.4 c/L below Perth. At the other end, Drysdale River (rural) averaged 358.2 c/L, 124.3 c/L above Perth. 5 of the 83 towns we ranked averaged less than Perth for U91. Oakford (rural) was the cheapest regional town for diesel at 251.6 c/L and Warmun the dearest at 389.5 c/L, a spread of 137.9 c/L.

U91 average over the period; the dashed line is Perth's average and green bars are towns at or below it.

A town is the ABS urban centre or locality a station is in, so a regional city and its suburbs are one town (a large city marked “city” is the city’s own outline). A station outside every town, such as a highway roadhouse, counts in its ABS locality, marked “(rural)”. A town is ranked with at least 2 stations that reported on a quarter of the days and a price on 60% of the days. “vs state” is the town’s average less the Western Australia average. Every ranked town is in the appendix.

Brent: Europe Brent spot price FOB (US Energy Information Administration). Exchange rate: the Federal Reserve's noon buying rate in New York. Both via FRED, Federal Reserve Bank of St. Louis, averaged over the days each is published; the Australian-dollar figures use each day's rate. A litre is a barrel ÷ 158.987. We use these free benchmarks because the refined-petrol and diesel benchmarks Australian wholesale prices follow (Singapore) are sold by subscription.

The listed count is the inventory used at build time, not a historical census of every operating station. One station selling two fuels on one day contributes two station–fuel–days. Fuel-specific counts must not be added to obtain a distinct station total. Calendar days describe the date window, not the number of new observations. A dash means the saved edition does not supply that count.

Carried retail price counts and excluded raw report counts were not retained; their shares are unavailable.

The number of stations selling each fuel and litres sold are not recorded, so fuel-market and sales coverage percentages are unavailable.

What the average measures

Reported station-day prices, not purchases. Each station counts once per day with an eligible price; stations with more covered days contribute more. The mean is not weighted by litres sold and does not measure what the average driver

paid.

Which history this uses

This report's station-price records begin on 13 April 2026. The separately published daily city-average series can begin earlier and use different boundaries and carry rules. Compare figures within the same series.

Coverage and carry

Perth uses its ABS urban area. An eligible price can be carried forward for up to 30 days. A covered day can therefore contain an earlier reported price. Station-days are observations, not distinct stations. The report does not quantify the share of carried prices or all excluded reports.

Wholesale spreads

Retail less terminal gate price is a gross indicative spread, not profit. It also covers transport, site and operating costs. Brent is a crude-oil benchmark, not a refined petrol or diesel price.

The station-day average

Each day, every service station counts once at its latest price as of the end of that day, in the state's own time. A price is carried forward for at most 30 days, and each average is taken over every station-day in the period. Prices held for checking, prices a station reported as unavailable and implausible prices are left out (we count U91 between 100.0 and 450.0 c/L).

Places

Perth is its ABS urban area, split into ABS SA4 areas. Outside it, a town is an ABS urban centre; a station outside those centres is grouped by its rural locality. A town or area counts its stations that report on at least a quarter of the days and is ranked with at least 2 of them and a price on 60% of the days.

Wholesale, margins and the cost of a litre

The terminal gate price is AIP's weekday price at the nearest terminal: the Perth terminal. AIP publishes the capital-city terminals only. Weekday prices are carried over weekends, and a period's price is the mean of its calendar days. The same-date comparison uses only dates with both series available and weights each date equally. Older period-average margins are omitted where those inputs are not retained. Crude oil is the US Energy Information Administration Brent spot price (FRED series DCOILBRENTEU), converted to Australian cents a litre at each day's exchange rate (FRED series DEXUSAL) and 158.987 litres a barrel, then averaged over the days both are published. In the cost of a litre, wholesale is the terminal gate price without GST and excise less crude oil, excise is the ATO rate averaged over the days, GST is one eleventh of the retail price, and the retail difference is the rest. Last year's average is the previous calendar year. Until we have a full calendar year of retail prices it shows the wholesale side only: the terminal gate price, crude oil and excise. Its GST, retail difference and margin need a retail price, so they are left out.

A suburb or town is the ABS locality a station sits in, ranked within its ABS Statistical Area Level 4 by the town rule. A town outside Perth is one of this report's towns (outside Perth's urban area) in that SA4.

The day of the week to buy

> Since our records began on 13 April 2026, Tuesday has been the cheapest day to buy U91 in Perth and Wednesday the dearest, 12.6 c/L apart on average.

U91	Cheapest day	Dearest day	Apart	60 litres	Since records began	Apart
Perth	—	—	—	—	Tuesday / Wednesday	12.6
Bunbury	—	—	—	—	Tuesday / Monday	0.2
Albany	—	—	—	—	Tuesday / Saturday	0.3
Busselton	—	—	—	—	Tuesday / Monday	0.2
Geraldton	—	—	—	—	Tuesday / Thursday	0.3
Kalgoorlie–Boulder	—	—	—	—	Tuesday / Friday	0.2

Esperance	—	—	—	—	Monday / Tuesday	0.1
Karratha	—	—	—	—	Friday / Monday	0.3
Port Hedland	—	—	—	—	Tuesday / Friday	0.3

Each day's average against the seven days centred on it, averaged by weekday, so a steady rise or fall over the period does not favour one end of the week. A place needs four of each weekday with prices from 5 stations or more; a month usually has too few, so it shows the year so far only.

A 60-litre tank, and the towns that moved most

> Filling a 60-litre tank with U91 in Oakford (rural) rather than Drysdale River (rural) saved $81.42 on average in October 2026. In Oakford (rural) the same tank cost $6.84 less than in Perth. At Billabong Roadhouse in Meadow, the cheapest station we ranked, it cost $26.82 less than at the state average.

U91, October 2026	Cheaper	Dearer	A litre	A 60-litre tank

About FuelRadar and this report

About FuelRadar

FuelRadar shows the prices service stations report across Australia, so drivers can find cheaper fuel near them, on a trip and over time. Our regional fuel price reports are free to read and to quote at fuelradar.com.au/fuel-price-reports.

How we collect the prices

Service stations report their prices to their state or territory government, which publishes them (named in the sources list). We read every station's prices every day and keep every price change.

The method in brief

Each day, every station counts once at its latest price as of the end of that day, carried forward at most 30 days. An average is taken over every station-day in the period, so busy and quiet stations count the same each day. Towns and areas are ABS outlines; a town is ranked only with enough steady stations. The full method is in the report's method section and at fuelradar.com.au/fuel-price-reports/wa/2026-10.
